2017

portals[®]

Portals Hardware was founded on the belief that we can provide you better designed hardware that also complements the rest of the bathroom, from both a design and finish perspective. We have expanded Portals' scope to include other products, always striving to provide the highest quality with innovative design features. We believe we add the greatest value by using our expertise to understand and expand the product marketplace and help you create bathroom environments that exceed your expectations.

Cover photo courtesy of: Oasis Shower Doors, 646 Springfield Street, Feeding Hills, MA 01030

We focus on providing you with the greatest value along with innovative design. This value comes through offering you lifetime warranties on our products as well as innovative design details that simplify the installation and adjustment of our products.

Our Process:

We are constantly looking at new products to introduce that add functions to our existing product set, meet a need not currently in the market or improve on existing products in the market.

- We start by assessing current products in the market, then build out a test area to evaluate existing products.
- Next we design a new product in house and manufacture a prototype to test the product.
- We test the prototype until we are confident of our design and then release the new product for production at our partner factories.

Our Capabilities:

Although the majority of our products are produced in a large scale manufacturing setting, we have invested in the ability to produce some custom products at our facility in Kansas City. This supports our product development process and also allows us to meet your needs in a timely manner.

So when you ask us whether we have the ability to produce a custom product, the answer is an unequivocal, Yes!

We also offer a wide array of stocked finishes to suit your design needs. Please note that not all items are available in all finishes. Please see Suites for available stocked finishes.

Stocked Finishes:

Please call 816.942.7413 for more information on our custom products.

Custom Dimension Products:

Many of our products can be produced in our Kansas City facility with custom dimensions. On a daily basis we produce handles and towel bars for you to use in unique situations or where you require a handle or towel bar to complement the dimensions of your frameless enclosure.

Our Commitment:

Ordered today, shipped today. More than 90% of all orders placed before 4pm CST will ship the same day.

Symphony Standard Duty Hinges

Maximum weight of 45 lbs per hinge

L.10.141 / L.10.141-85*
90° Wall/Glass Hinge
